2024 Performance Plan - Employee for Manoj Kalra

Introduction

Your annual performance plan

Your performance plan and review provides you with a working document to plan your annual performance goals, targets and monitor your progress throughout the year

Regular check-ins

Performance and accomplishments will be discussed at your regular check-in meetings with your manager, at mid-year and year-end performance discussions.

Tips - Keep track

Add your accomplishments in your performance plan, or in a separate document throughout the year to make your mid-year or year-end contribution simpler. Change the status (e.g. on track, completed, postponed) of your goals before mid-year and year-end discussions by selecting the edit pencil.

Performance Goals

The Goal plan is used to record your performance goals for the current year and are developed in consultation with your manager.

For assistance and more details, refer to the People Central quick reference guides for People Central for Employees and People Central for People Managers on Goal Setting,

Maintain a safe working environment

Employee's Comments (Max. 8000 characters)

a) No injuries reported.
b) Hazards have been addressed.
c) AMI lab Safety policy manual ready for review.
d) 6S activity in progress.

Ratings from Others

Leonard Jarillas (Manager)

Met Goal Target. 3

The team has made some progress in aligning with the 6S procedure, but full integration into daily practices is still needed. Additionally, the AMI Lab Safety policy manual remains to be initiated, which is essential for maintaining a comprehensive and safe working environment.

0 LTI, 0 MTI, 0 FAI but AMI Lab Safety policy manual and 6S procedure still in progress

Goal Details

Category:
Health, Safety & Environment

Goal Description:
To maintain a safe working environment, risks and hazards shall be identified and managed. There will be several HSE programs that will be initiated throughout the year to achieve this goal. It is expected that all team members shall participate in these programs.

Goal Threshold:
- 0 LTI, 0 MTI, 1 FAI
- AMI Lab Safety policy manual and 6S procedure available and approved by October 2023
- 80% of 6S activities in the sustain phase by November 1 2023
- 5 identified hazards not reported

Goal Target:
- 0 LTI, 0 MTI, 1 FAI
- AMI Lab Safety policy manual and 6S procedure available and approved by September 2023
- 6S policy established and 90% of 6S activities in the sustain phase November 1 2023
- 3 identified hazards not reported

Goal Maximum:
- 0 LTI, 0 MTI, 0 FAI
- AMI Lab Safety policy manual and 6S procedure available and approved by August 2023
- 6S policy established and 100% of 6S activities in the sustain phase November 1 2023
- 0 identified hazards not reported

- 3-Phase wiring for automation completed in the Lab.
- Automation of APT 320XAC power supply control completed.
- Automation for Itech Electronic Load control completed.
- Automation Activity for QoS Tests completed for L&G and Secure meters.

Ratings from Others

Leonard Jarillas (Manager)

★★★☆☆

Met Goal Target. 3

The team has made notable progress in certain initiatives, with the Testing Automation Initiative reaching 30% completion and the 6S as BAU initiative at 40%. The LAB Standard Operating Procedure, however, is still in its early stages, with only 10% completion. These initiatives are vital for long-term efficiency and should be prioritized in the second half of the year.

20%	★ ★ ★ ★ ★ Select a rating...

Employee's Comments (Max. 8000 characters)

a) All testing is completed on/before time.
b) No issues found post go-live that could have reasonably found through testing.

Ratings from Others

Leonard Jarillas (Manager)

★★★☆☆

Met Goal Target. 3

Several key testing projects have been successfully managed, with the SELC PE Cell Firmware project completed and the BBD Firmware 5.x project in the production deployment phase. However, other projects, such as the NIC Firmware 5.x for RNI and AKIO/ARM, are still in progress. Some projects, like the Meter Programs for Hot Water Load Shift, have been postponed, while others, such as those involving L&G Rxx Firmware, are awaiting necessary resources. Continued focus on these projects is needed to ensure timely completion.

'- All testing is completed on time

Test Case Execution, Defect Identification and Reporting

Weight:
10%

Rating:
Select a rating...

Employee's Comments (Max. 8000 characters)

a) Test certificate have been reviewed and approved ahead of schedule
b) Test Summary Report created as per schedule.
c) No mistakes have been identified during review of test results
d) Defect report very clear and no clarifications needed by vendor

Ratings from Others

Leonard Jarillas (Manager)

Met Maximum Goal Target. 4

Test case execution is proceeding well. However, there is a need for greater independence in the preparation and submission of test summaries, which would streamline reporting and improve overall quality.

Test execution was performed well and defect identified were reported and anlysed in a timely manner.

Goal Details

Category:
Risk & Compliance

Goal Description:
Execute test cases and report test results according to defined criteria (i.e. accuracy, completeness, detail, vigilance, schedule variance, improvement).

Goal Threshold:
- Test summary report or test certificate approved within 10% schedule variance.
- Minor mistakes (i.e. missing/wrong attachments, test result not clear) identified during review of test results.
- Minor revision and improvement of test cases increasing test efficiency and quality as agreed by peer review.
- No P1, P2 Defect Leakage.
- 10% defect rejection
- Minor clarifications needed on defect report. All attachments included.
- Test report sent weekly

Goal Target:
- Test summary report or test certificate approved on schedule.
- No mistakes (i.e. complete attachments, test results are clear) identified during review of test results.
- Minor revision and improvement of test cases increasing test efficiency and quality as agreed by peer review.
- No P1, P2 Defect Leakage, maximum five P3 defects leakage.
- No defect rejection
- Defect report very clear and no clarifications needed by reviewer
- Test case improved for unidentified defects
- Test report sent weekly

Goal Maximum:
- Test summary report or test certificate approved ahead of schedule.
- No mistakes (i.e. complete attachments, test results are clear) identified during review of test results.
- Significant revision and improvement of test cases increasing test efficiency and quality as agreed by peer review.
- No Defect Leakage
- No defect rejection
- Defect report very clear and no clarifications needed by vendor.
- Test report dashboard implemented

Development Goals

Plan your development - own and drive your career

Development goals should give you direction, motivation and help ensure you're on your way to reaching your career aspirations.

Talk to your manager about your career aspirations and goals. Agree on capabilities that you need to develop or improve in your current role, or to prepare you for the next role. Consider the best way to develop those capabilities using the 70/20/10 learning principles.

Create 1-3 development goals you can own and drive in 2024.

Resources

You'll find all the tools and resources to assist you with your career growth, and setting development goals on iLearn Central and the People Hub.

Resources include:

- **Training and development** programs, schedule, podcasts and microlearning
- **iLearn tile: Career development - career development guide** – identify your career aspirations and development goals
- **iLearn tile: Future ready skills - future ready skills guide** – identify 1-2 of the future ready skills to develop in 2024
- **People Hub - L&D - Career framework or pathways** – showcases specific areas of expertise and capabilities required for a variety of roles across the organisation

Values

"How" we approach our work is just as important as "what" we achieve in our role. Our five company values define what is expected of all employees. This section of the performance review focuses on "how" you have achieved your goals.

Details on our Values and Behvaiours can be found on the intranet.

Live Safely

Safety is our first priority. We never compromise health and safety, either at work or at home. We are constantly aware of the risks to ourselves and others and actively manage them. We share our experiences so that we all learn.

Leonard Jarillas

The team has excelled in fostering strong teamwork and maintaining a high standard of safety. Collaboration has been a significant strength, with team members working together effectively, showing mutual respect, and driving collective success. Safety practices have started being implemented, reflecting the team's commitment to maintaining a secure and healthy work environment. However, there is an opportunity to improve in driving business innovation and efficiency.

Mid-Year Performance Review

Mid-Year Review - Overall Comments (Max. 8000 characters)

Manoj Kalra

Maintaining a safe working environment by following the lab policy and review process for the work being performed in the lab.
Network Intelligence Employee opinion index: As joined recently, yet to receive the link for the survey.
Business Improvement Initiatives & Projects: Working on the automation activities for the testing.
Test Case Execution, Defect Identification and Reporting: Completed the NIC FW testing for AKIO FW 5.4.33.
Development Goals: Completing iLearn trainings on-time. Nominating my-self for the value addition trainings.

Leonard Jarillas

The team's performance at midyear reflects a strong commitment to key areas such as safety, testing project management, and business improvement initiatives. Progress in safety practices, although ongoing, requires further efforts to ensure full integration. Testing projects have been managed effectively, with several key milestones achieved, though some projects are still in progress or pending resources. Business improvement initiatives show promising progress, particularly in automation and embedding 6S practices into daily operations. Moving forward, the team should focus on improving test planning and reporting skills, accelerating the completion of ongoing initiatives, and addressing any outstanding tasks to ensure continued success in the second half of the year.

Performance Summary

The overall form rating incorporates the ratings for performance goals, values and leadership behaviours assigned by your manager. Employees cannot see any ratings, or manager comments until the performance plan is moved to the ‘employee signature’ step in the route map.

Year-End Review - Overall Comments (Max. 8000 characters)

Manoj Kalra

I would like to say that Overall, this year was full of learning and testing activities. Being part of good team where each one is always available for help and having positive attitude.

While working on Business improvements, we did a good progress in the automation side. Other than this preforming the execution of NIC and Meter FW testing activities also completed with a lot of vendor discussions and Triage activity taking place.
While working on all these activities, safety has always been the priority. We did a good progress on 6S activities, and Lab Safety documentation as well.
Had opportunity to attend team gathering events where I met other employees during team activities which helped me to know more members in broader Team.
I can say this year went well with great learning, execution and fun activities.

Leonard Jarillas

This year has been an exceptional one with significant milestones achieved. Safety remains a top priority, and I'm proud to report zero LTIs, MTIs, and FAIs. While the AMI Lab Safety Policy Manual and 6S procedure are still in progress, great strides have been made, and these will remain a focus moving forward.

The Employee Opinion Survey (EOS) reached the maximum target, highlighting a positive and collaborative team culture. Testing was another area of success, with all testing completed on time and no significant severity 1 or 2 issues post-go-live that could reasonably have been detected during testing.

Project and operational goals were also successfully achieved, with 90% of initiatives completed, 100% of BAU and project support delivered within schedule, and the meter program released within just 24 hours. Furthermore, test execution was conducted effectively, with defects identified, analyzed, and reported in a timely manner.

Looking ahead, there is room for growth in reviewing test cases and test planning, and I am eager to build on this next year.

Thank you to the team for their outstanding commitment and effort throughout the year. Your dedication has made these achievements possible. I'm excited to see what we can accomplish together in the coming year!
