2025 Performance Plan - Employee for Manoj Kalra

Introduction

Your annual performance plan

Your performance plan and review provides you with a working document to plan your annual performance goals, targets and monitor your progress throughout the year

Regular check-ins

Performance and accomplishments will be discussed at your regular check-in meetings with your manager, at mid-year and year-end performance discussions.

Tips - Keep track

Add your accomplishments in your performance plan, or in a separate document throughout the year to make your mid-year or year-end contribution simpler. Change the status (e.g. on track, completed, postponed) of your goals before mid-year and year-end discussions by selecting the edit pencil.

Performance Goals

The Goal plan is used to record your performance goals for the current year and are developed in consultation with your manager.

For assistance and more details, refer to the People Central quick reference guides for People Central for Employees and People Central for People Managers on Goal Setting,

Maintain a safe working environment

Weight:
5%

Rating:
Select a rating...

Employee's Comments (Max. 8000 characters)

1.Hazard Reporting: No identified hazards have gone unreported.
2.Safe Work Practices: All safety precautions are consistently followed when operating on panels, cabinets, meters, power supplies, and electronic loads, with team members supporting each other to maintain compliance.
3.Collaborative Verification: Connections are cross-checked before dismantling instruments for calibration, always in the presence of a team member to reinforce safety and accountability.
4.6S Improvements: Conducted 6S activities collaboratively to improve organization and attribute specifications for both production and non-production meters. Completed 6S activities for cabinets, meter Panels, and racks as a team effort, promoting a safe and organized work environment.

Ratings from Others

Leonard Jarillas (Manager)

★★★★☆

Met Maximum Goal Target. 4

Manoj demonstrated strong commitment to safety, achieving zero LTIs, MTIs, and FAIs throughout the year. While this is an excellent outcome, the **6S policy still needs to be completed early in 2026**, along with ensuring all 6S activities are in the sustain phase. This will be a key focus area moving forward.

Goal Details

Category:	Goal Description:	Goal Threshold:
Health, Safety & Environment	To maintain a safe working environment with risks and hazards identified and managed.	- 0 LTI, 0 MTI, 1 FAI - 80% of 6S activities in the sustain phase by November 1 2025 - 5 identified hazards not reported

4.MOG Group support for: M-Cubed, EMPWIN, MVLTxi, Calegration, CalSoft- Spotlight Award (Succeed together, Improve our business)

5.Work Instruction completed:
   a.WI_XXXX_FSU Credit Update
   b.WI-XXXX UE MST Tool Access Request Procedure
   c.WI_XXXX_ProdReplicaNamingConvention
   d.MVLTxi read update for DLMS meters
6.Oil Level Camera Battery management and improvement on battery life
7.Upgraded lab machines.

Ratings from Others

Leonard Jarillas (Manager)

★★★☆☆

Met Goal Target. 3

Manoj supported initiatives such as **Calegration**, but most improvement initiatives remain incomplete. These will need focused attention early in 2026 to ensure delivery and alignment with business priorities.

Goal Details

Category:	Goal Description:	Goal Threshold:
Business Improvement	Deliver against agreed key 2025 improvement initiatives and BAU project support	- 80% of initiatives completed - 80% of BAU and project support completed - Customer requests resolved within 48 hours
Goal Target:	**Goal Maximum:**	**Weight:**
- 90% of initiatives completed - 90% of BAU and project support completed - Customer requests resolved within 24 hours	- 100% of initiatives completed - 100% of BAU and project support completed - Customer requests resolved within the same day as requested	15.0%

Establish DI lab

Weight:	Rating:
25%	☆☆☆☆☆ Select a rating...

Employee's Comments (Max. 8000 characters)

1.Lab Wish list prepared.
2.Multiple purchase request and purchase order raised against the above list.
3.All items ordered.

4. In process of receiving them or getting serviced.

Ratings from Others

Leonard Jarillas (Manager)

★★★☆☆

Met Goal Target. 3

Manoj laid the foundation for the DI Lab by purchasing equipment and initiating setup. However, the lab did not receive the level of attention required to fully realize its potential. Next steps include **identifying and creating use case requirements**, designing tests for those cases, and continuing to explore **automation opportunities for efficiency**. This will require significant effort early in 2026.

Goal Details

Category:
Business Improvement

Goal Description:
Establish a capability to test DI lab for both functionality and application development.

Goal Threshold:
- Create use case requirements
- Design DI lab consulting with other vendors and DNSPs that have used DI meter.
- Ensure that requirements are met.
- Purchase DI test equipment
- Assemble lab

Goal Target:
- Create use case requirements
- Design DI lab consulting with other vendors and DNSPs that have used DI meter.
- Ensure that requirements are met.
- Lab setup to be used remotely, staff do not need to be at Brooklyn.
- Purchase DI test equipment
- Assemble lab, and lab functional
- App development started

Goal Maximum:
- Create use case requirements as well as thought put into future cases.
- Extensive DI lab consultation with other vendors and DNSPs that have used DI meter.
- Ensure that requirements are met.
- Lab setup to be used remotely, staff do not need to be at Brooklyn.
- Purchase DI test equipment
- Assemble lab, and lab functional before October.
- Automation of test cases underway with new equipment
- App development started using a DI meter.

9. Meter FW 8.2.R66 (U1300)
10. CityEdge

Ratings from Others

Leonard Jarillas (Manager)

Met Maximum Goal Target. 4

Manoj delivered **good test summary reports with minor revisions**, showing progress in execution and reporting. Moving forward, he should **consider implementing test report dashboards** to enhance efficiency and transparency.

Goal Details

Category:
Risk & Compliance

Goal Description:
Execute test cases and report test results according to defined criteria (i.e. accuracy, completeness, detail, vigilance, schedule variance, improvement).

Goal Threshold:
- Test summary report or test certificate approved within 10% schedule variance.
- Minor mistakes (i.e. missing/wrong attachments, test result not clear) identified during review of test results.
- Minor revision and improvement of test cases increasing test efficiency and quality as agreed by peer review.
- No P1, P2 Defect Leakage.
- 10% defect rejection
- Minor clarifications needed on defect report. All attachments included.
- Test report sent weekly

Goal Target:
- Test summary report or test certificate approved on schedule.
- No mistakes (i.e. complete attachments, test results are clear) identified during review of test results.

Goal Maximum:
- Test summary report or test certificate approved ahead of schedule.
- No mistakes (i.e. complete attachments, test results are clear) identified during review of test

Weight:
15.0%

- Minor revision and improvement of test cases increasing test efficiency and quality as agreed by peer review.
- No P1, P2 Defect Leakage, maximum five P3 defects leakage.
- 5% defect rejection
- Defect report very clear and no clarifications needed by reviewer
- Test case improved for unidentified defects
- Test report sent weekly

results.
- Significant revision and improvement of test cases increasing test efficiency and quality as agreed by peer review.
- No Defect Leakage
- No defect rejection
- Defect report very clear and no clarifications needed by vendor.
- Test report dashboard implemented

Development Goals

Plan your development - own and drive your career

Development goals should give you direction, motivation and help ensure you're on your way to reaching your career aspirations.

Talk to your manager about your career aspirations and goals. Agree on capabilities that you need to develop or improve in your current role, or to prepare you for the next role. Consider the best way to develop those capabilities using the 70/20/10 learning principles.

Create 1-3 development goals you can own and drive in 2024.

Resources

You'll find all the tools and resources to assist you with your career growth, and setting development goals on iLearn Central and the People Hub.

Resources include:

- **Training and development** programs, schedule, podcasts and microlearning
- **iLearn tile: Career development - career development guide** – identify your career aspirations and development goals
- **iLearn tile: Future ready skills - future ready skills guide** – identify 1-2 of the future ready skills to develop in 2024

- **People Hub - L&D - Career framework or pathways** – showcases specific areas of expertise and capabilities required for a variety of roles across the organisation

Complete SMEShip

Employee's Comments

- Successfully completed the **SMEship program**, which focuses on three key domains: **Knowledge, Outcomes, and Engagement**.
- These domains are research-backed to enhance subject matter experts' contribution and impact within the business.

Ratings from Others

Leonard Jarillas (Manager)
Can't wait to see Manoj practice the SMEShip learnings.

Values Comments (Max. 4000 characters)

Manoj Kalra

Live Safely:

Safetyhas been a top priority throughout all activities. I ensured strict adherenceto safety protocols while working on panels, cabinets, meters, power supplies,and electronic loads. Regular cross-checks, team presence during criticaltasks, and 6S practices in the lab reinforced a safe and organized environment.

Be the best you can be:

Iconsistently aimed for excellence by delivering accurate and reliable metertesting, which supports secure and efficient energy services. Beyond coreresponsibilities, I proactively assisted other teams, such as MOG, to meeturgent requirements and maintain smooth project progress.

Succeed together:

Collaborationwas central to my work this year. I partnered with multiple teams across AssetManagement, ACCG, and MOG, and contributed to strategic initiatives likeCalegration software integration. This teamwork was recognized through the**Spotlight Award, highlighting the collective success achieved**.

Improve our Business:

Bydeveloping an automation framework using Python Selenium and completing ProjectManagement Fundamentals training, I introduced efficiencies that reduce manualeffort and improve testing accuracy. These initiatives directly enhanceproductivity and strengthen the overall testing process. The Caligration project work was recognized under 'Improve our business' value as well.

Be customer and community minded:

Customerrequirements guided every testing and automation activity. I ensured that alltest cases and validation steps aligned with real-world use cases, deliveringsolutions that are relevant, reliable, and supportive of community energyneeds.

Leonard Jarillas

Over the first half of the year, you have shown strong alignment with our core values, particularly **“Succeed Together”**. Your willingness to step in and contribute to the CALegration project has been a clear example of collaboration and teamwork in action. By working closely with colleagues across different areas, you helped drive the project forward and ensured that challenges were met with shared solutions. Your support not only added value to the project outcomes but also strengthened the team’s cohesion and ability to deliver collectively.

At the same time, you have consistently embodied **“Be The Best You Can Be.”** Taking the initiative to pick up new responsibilities and contribute in an unfamiliar area demonstrated both adaptability and a growth mindset. The way you approached the CALegration project reflected a determination to stretch beyond your comfort zone, learn quickly, and make meaningful contributions. This commitment to personal growth while delivering value to the team sets a strong example for others.

Your contributions highlight the balance between individual effort and collective success that underpins our company values. Thank you for your commitment, positive attitude, and willingness to step up when it matters most. These actions not only supported the project but also helped create a culture of collaboration and continuous improvement within the team. Keep building on this momentum—it will serve both your personal development and the success of our wider goals.

Mid-Year Performance Review

Mid-Year Review - Overall Comments (Max. 8000 characters)

Manoj Kalra

This year has been fruitful in terms of deliverables and learning. Many testing projects were delivered while parallelly working on supporting MOG group, Initiative program i.e. Calegration SW integration to production, Automation framework development. As a requirement of work and interest in python selenium, I completed python selenium framework training as part of my 'out of office' time activities for learning, which helped me in my work to develop the framework for testing. I completed 1 year milestone working with United Energy and feel more confident in terms of owning and delivering the work. Had great chance of interacting and building relationship with multiple teams be it Asset Management team, MOG group, ACCG etc. With respect to learning, I completed SMEShip and "ChatGPT is your copilot to success" trainings. I was honoured with a **Spotlight Award** this year in recognition of my contributions to the Calegration project, highlighting the impact and value of my work in smart grid testing."

Leonard Jarillas

- DI Lab Establishment – This is at risk of not being met, especially around automation equipment and lab setup. There's a clear need to sharpen focus on completing the setup and considering automation earlier to hit the maximum standard.
- Testing Projects – Solid progress here. Several firmware upgrades and testing phases are already completed, and no major issues have been identified post-go-live. The challenge now is to tighten tracking on schedule and budget, and accelerate pending tasks like PACT, DLMS Phase 2, and newer firmware rollouts to push performance to maximum level.
- Business Improvement Initiatives & BAU – Some initiatives are moving (6S and Testing Automation in progress), but others like the Knowledge Management Handbook and SOPs haven't started yet. Driving these forward will be key to exceeding expectations.
- Test Case Preparation & Reporting – Currently, coverage and reporting metrics aren't being monitored consistently, and test plans are often copied from previous efforts. To reach maximum standards, the focus should be on building complete coverage and ensuring metrics are regularly reported.
- Test Case Execution & Defect Reporting – You've avoided P1/P2 leakages and kept rejection rates at zero, which is excellent. To exceed the maximum target, we'll need to see not just defect-free execution but also improvements in reporting dashboards, schedule discipline, and proactive refinements of test cases.

Overall, you're doing well in execution and delivering stability on critical testing projects, which is very much appreciated. Thank you for consistently showing commitment and helping the team stay on track — your work makes a difference.

Looking ahead, I'd encourage you to focus on the higher-level improvement opportunities: driving automation in the DI Lab, ensuring project schedules and budgets are tightly tracked, and pushing reporting and test coverage to a new level. These will not only help you meet targets but also exceed them. I'd also love to hear your thoughts on what additional support or resources could help you progress more smoothly.

Keep up the great effort — the second half of the year is a chance to really step up and showcase the full potential of what you can achieve.

Year-End Review - Overall Comments (Max. 8000 characters)

Manoj Kalra

Over the past year, I have focused on delivering high-quality outcomes while expanding my technical and project management capabilities. Key contributions include successful completion of multiple testing projects and active involvement in strategic initiatives such as the Calegration software integration into production and the development of an automation framework to streamline testing processes.

Recognizing the growing need for automation, I invested time in learning **Python Selenium** and applied this knowledge to build a robust framework and develop test scripts. This effort will enhanced efficiency and reduced manual intervention in testing activities. In addition, I completed **Project Management Fundamentals** training, equipping me with essential skills to plan and execute testing projects more effectively, ensuring better alignment with timelines and stakeholder expectations.

Collaboration has been a strong focus throughout the year. I worked closely with teams across Asset Management, MOG, and ACCG, fostering strong partnerships and ensuring smooth delivery of complex projects. My commitment to continuous learning was further demonstrated through completion of **SMEShip**

and "ChatGPT is Your Copilot to Success" trainings, which have strengthened both technical and productivity skills.

A highlight of the year was receiving the **Spotlight Award in Succeed together, improve our business category**, for my contributions to the Calegration project, reflecting the impact and value of my work in advancing smart grid testing initiatives.

Overall, this year has been marked by significant progress in automation, project management, and cross-team collaboration, positioning me to deliver even greater value in the future.

Leonard Jarillas

Manoj, thank you for your hard work and contributions throughout 2025. Your efforts have been critical in maintaining a safe working environment, supporting testing projects, and progressing business improvement initiatives. Your involvement in CityEdge and other testing activities ensured quality outcomes and timely delivery, which has been highly valued by the team.

You also laid the foundation for the DI Lab by purchasing equipment and initiating setup, and your thinking around automation is a positive step toward future efficiency. However, the DI Lab did not receive the level of attention needed to fully realize its potential, and significant work will be required early in 2026 to complete use case requirements, design tests, and advance automation. Similarly, the AMI Lab Operational Manual remains incomplete and will need focused attention to ensure consistent and safe operations.

Overall, your contributions this year have set a strong platform for success. Thank you for your commitment and support throughout 2025. As we move into 2026, I encourage you to build on these achievements, tackle these priority areas with focus, and continue driving improvements that make a real impact.

Thank you for a great year, and I look forward to seeing your continued success in 2026!
